HOUSING REGENERATION STRATEGIES
DIT student projects for Waterford City, Ireland

Jim Roche - Orla O’Donnell, Jim Ward
jim.roche@dit.ie

The location of the site on the north side of Waterford City along the River Suir to the present, the scale of this scheme will address social, economic and environmental concerns within the context of the city and the river. The project focuses on the adaptive reuse of the Waterford Civic Museum and the Urban Backlands. The project included the design of a new pedestrian bridge across the river, which connects the north and south sides of the city. The project also included the design of a new public square in the Civic Museum

SITE A – North Quays

The site is located at the south side of the river and is adjacent to the Civic Museum. The project includes the design of a new pedestrian bridge across the river, which connects the north and south sides of the city. The project also includes the design of a new public square in the Civic Museum.

SITE B – Exchange Street

The site is located on the north side of the river and is adjacent to the Urban Backlands. The project includes the design of a new pedestrian bridge across the river, which connects the north and south sides of the city. The project also includes the design of a new public square in the Civic Museum.

SITE C – Urban Backlands

The site is located on the south side of the river and is adjacent to the Urban Backlands. The project includes the design of a new pedestrian bridge across the river, which connects the north and south sides of the city. The project also includes the design of a new public square in the Civic Museum.
