the case is right
The aim of this game is to guess whether the next occupation’s salary is higher or lower than the one currently in play.

For example, if you are a ‘Display Artist’ earning an average salary of €28,718 (€15.58ph), would you be earning more or less than a ‘Lighting Technician’ also on an average salary?

Sales Assistant
€22,099.50
€11.99ph
Higher or lower?

Cleaner
€17,510.40
€9.50ph

Did you guess correctly?
To make things a little more challenging and to highlight the difference in pay based on qualifications, there are three different levels of salary:

Low
Average
High

The idea here is for you to learn about the different types of jobs you can work in and how much money you could earn!

What have we learned?

- A tiny snippet of the types of jobs available to you
- Different levels of pay based on how qualified you are, from low to highly paid
- That you probably cannot judge how much someone earns based on their job!

Shall we try it a little differently?

Now that you have a better idea of how much different jobs could pay, we’ll show you a set of occupations and the person who guesses the closest to the correct figure will win a prize!

But of course the real reward is the knowledge you will obtain 😊
