FOREWARD BY THE PRINCIPAL

This booklet has been prepared to provide you with information about the wholetime courses offered by the College of Technology, Bolton Street, Dublin 1 and how to apply for them. We are conscious of the difficulties facing young people in deciding on careers and selecting the most suitable courses in order to prepare for them. We hope that you will find the booklet informative and helpful. We encourage you to consider carefully the course options that we have to offer in this College.

Since Bolton Street is but one of the six Colleges of the Dublin Institute of Technology, each of which plays a complementary role in the provision of third level education, its range of programmes is necessarily concentrated. We offer considerable opportunities to those wishing to prepare for the important professions of Architecture, Engineering and Surveying and careers related to these disciplines in Construction, Manufacturing and Transport. The College is also the main centre in Ireland preparing young people for entry into the Printing Industry. Each of these sectors makes a vital and major contribution to the economy and consequently offer many challenging and rewarding job opportunities for the decades ahead.

There are many things one could say about the College and its programmes which may interest you. It is a technological education institution with the prime objective of assisting young people to acquire the knowledge and expertise necessary for fulfilling and rewarding careers. Our well qualified and experienced staff and extensive range of laboratories, work-shops, library and other facilities provide the basis for a vigorous and lively academic community. The College has a national and international reputation and the record of achievements of its graduates is something of which it is justifiably proud. If you decide to apply and are admitted we hope that you will enjoy your stay with us.

Michael O’Donnell

City of Dublin Vocational Educational Committee

Chief Executive Officer: W. J. Arundel, BComm, HDip
INTRODUCTION TO THE COLLEGE

In 1887 the first City of Dublin Technical School was established in Kevin Street and from that initiative the present system of schools and colleges developed. The College in Bolton Street was opened in 1911 to provide education in Building, Engineering and Printing, lines of specialisation which have continued down to the present day. The first whole-time day courses commenced in 1920 with the inauguration of an apprentice Scholarship Scheme. With the establishment of an Irish Government, technical education came within the aegis of the Department of Education. A Commission which was established in 1926 made recommendations for developments which led to the Vocational Education Act of 1930. The system of schools and colleges expanded in succeeding decades under the City of Dublin Vocational Education Committee, and the Bolton Street College was enlarged with additional buildings in 1958, 1963, 1981 and 1987. The development of professional and technician courses began in the 1940's and over the years these gained the recognition of professional and academic bodies in Ireland and other countries.
Departmental Boards are concerned with the development of courses and facilities at Departmental level. There are Course Committees to advise on the development of major courses. There are also Advisory Committees for major disciplines which assist the College in keeping courses abreast of developments in their professional and industrial fields.

Recent College Developments

A major new extension to the college was completed during the 1987/88 session significantly enhancing its accommodation and facilities. This includes a new library with seating for 450 students; a major new restaurant with similar seating capacity, much improved student facilities including social areas, student shop, bank and first aid room; a large lecture theatre with 320 seats; and a range of drawing studios, classrooms, staff offices and other accommodation.

Further enhancements were implemented during the 1988/89 session including the refurbishment of parts of the College vacated following the transfer of some activities to the Extension. These include a new staff common room, new Advanced Manufacturing and Building Science laboratories and further development of the College’s computing facilities which are linked through high speed data circuits to a major central DIT computing facility located at the DIT offices at 14 Upper Mount Street.

Establishment of CAS

A new organisation was established in 1990 known as CAS (Central Admissions Service) for the purpose of dealing with applications to the Irish third-level technological Colleges on a centralised basis. It has a membership which is representative of the six Dublin Institute of Technology (DIT) Colleges, the nine Regional Technical Colleges, Limerick College of Art, Commerce and Technology (CoACT), and the Crawford College of Art and Design.

The CAO and CAS organisations have now entered into an arrangement whereby applicants, using a single application form, may in 1991 and subsequent years choose from the entire range of courses in the CAO and CAS systems. There are three sections on the application form and using these an applicant may choose:

(a) up to ten courses in order of preference from the courses included under the title ‘CAO List’ in the CAO/CAS handbook (which includes all DIT Degree courses).
(b) up to three courses in order of preference from the courses included under the title ‘CAS List 1-RTC Degrees’ in the CAO/CAS handbook.
(c) up to ten courses in order of preference from the courses included under the title ‘CAS List 2 Diploma/Certificate/Other’. This includes all wholetime Certificate, Diploma and non degree courses offered by the DIT and other technological colleges.

The joint CAO/CAS applications system will be administered from the CAOs premises at Tower House, Eglinton Street, Galway. Copies of the CAO/CAS Handbook which provides all relevant information about the CAO/CAS joint application system and the courses which are included in it are available on request as are Application Forms.
Application Fees:
- Irish and other EC Applicants (ordinary fee): £18
- Late applications (received between 2 February and 31 March): £26
- Late applications (received after 31 March): £40
- Overseas applicants (ordinary fee): £36

Closing Dates:
- Irish and other EC Applicants: 1 February 1991
- Overseas Applicants: 15 December 1990

Due to the inclusion of Aptitude Tests and other assessments as part of the selection process, applications received after 1 February 1991 cannot be considered for the Architectural courses, FTO1 in the CAO List, and DTO1 in the CAS List 2.

Late applications will not be considered from Overseas applicants if received after 15 January 1991.

With the exception of the two Architectural courses referred to above, late applications in respect of all other courses offered by the College and included in the CAO and CAS lists will be considered from Irish and other EC applicants if received by 1 August, 1991.

Postponement of Course Choice:
When submitting their application forms applicants may postpone entering their course choices in any or all of the three sections of the application form until 31 March 1991. If they avail of this provision they must then communicate their course choices to the CAO/CAS office before 31 March at the latest.

After an application is submitted an applicant may change his/her course choices as often as he/she wishes up to 1 August.

These facilities are not available to applicants for the Architectural courses, FTO1 in the CAO List, and DTO1 in the CAS List 2 for the reasons already indicated in a previous section.

Further Information:
Further information about the Joint CAO/CAS Application System for 1991 entry are given in the CAO/CAS Handbook and on the Application Form, both of which are available from:

CAO/CAS,
Tower House,
Eglinton Street,
Galway.

EDUCATIONAL REQUIREMENTS AND SELECTION PROCEDURES FOR DEGREE COURSES IN 1991

EDUCATIONAL REQUIREMENTS

(a) Courses FTO1, FTO2, FTO3: Irish Leaving Certificate with passes in six subjects, two of which must be at Grade C or higher on higher level papers or an acceptable equivalent qualification. The six subjects must include Mathematics and English.

(b) Course FTO4: Irish Leaving Certificate with passes in six subjects including Grade C or higher on higher level papers in Mathematics and one of the following subjects: Physics, Chemistry, Physics with Chemistry, Applied Mathematics, Construction Studies and Engineering or an acceptable equivalent qualification. The six subjects must also include English.

SELECTION PROCEDURES

Applicants are ranked in order of educational score merit in accordance with the points system shown below, allocated to the results of six subjects obtained in one or more Leaving Certificate examinations, having regard to the relevant course entry requirements. Obligatory subjects are scored together with the best three or four other subjects as appropriate in determining the overall score. Generally demand exceeds the number of places available and qualifications above the minimum are required.

(i) In the case of the Architectural course FTO1/B101 applicants are required to take an aptitude test in March/April. Applicants who demonstrate a particular suitability in this test are invited to an interview assessment. A maximum of 10 points are awarded for the applicant’s performance in the aptitude test and up to a further 10 points for the interview assessment. The results of the aptitude test and the interview assessment are combined with the total educational points scored in the six subjects as specified above to produce an overall rating.

(ii) In the case of the professional/degree level courses in Surveying and Engineering (i.e. FTO2/B111, FTO3/B110, FTO4/B121-124) the selection is based on the educational score in six subjects as already described.

DIT POINTS SYSTEM FOR DEGREE COURSES IN 1991*

The following table shows the points system which will be used in 1991 to calculate educational scores for all the College’s full-time degree courses except FT04 which offers an enhanced points rating for certain subjects (see below).

</tbody>
</table>

Due to the inclusion of aptitude tests and interviews in the selection process it is not feasible to give the number of points which were required to gain entry to course FTO1 (B101) Architecture in 1990.

** Not all applicants who scored this number of points obtained places in 1990.

QUALIFICATIONS OTHER THAN THE IRISH DEPARTMENT OF EDUCATION LEAVING CERTIFICATE

The College gives consideration to qualifications other than the Leaving Certificate as meeting the entry requirements for its courses (such as the GCE or other qualification of equivalent standard). In accordance with a decision already announced, the NUI Matriculation is not acceptable as an appropriate DIT entry qualification in 1991.

Applicants for degree level courses may present a General Certificate of Education (GCE) with passes in six subjects including at least two at Advanced level. Overseas applicants must also satisfy the College as to their proficiency in written and spoken English.

Grades A, B and C at GCE Advanced Level meet the higher level paper requirements for degree courses and carry points ratings of 15, 12 and 10 respectively. Grades D and E at GCE Advanced Level and Grades A, B and C at Ordinary Level GCE are regarded as equivalent to ordinary Leaving Certificate passes and carry points ratings of 7, 5, 3, 2 and 1 respectively.
EDUCATIONAL REQUIREMENTS AND SELECTION PROCEDURES FOR ENTRY INTO THE FIRST YEAR OF THE COLLEGE CERTIFICATE, DIPLOMA AND OTHER NON-DEGREE COURSES IN 1991.

EDUCATIONAL REQUIREMENTS

(a) Courses DT01, DT02, DT03, DT04, DT05, DT13, DT45 and DT46: Leaving Certificate with passes in five subjects including Mathematics and English or an equivalent qualification.

(b) Courses DT41, DT42 and DT44: Leaving Certificate with passes in five subjects including Mathematics, English and at least one of the following subjects: Physics, Chemistry, Physics and Chemistry, Applied Mathematics, Construction Studies, Technical Drawing, and Engineering or an equivalent qualification.

SELECTION PROCEDURES

Eligible applicants are ranked in order of educational score merit in accordance with the points system shown below. Educational points are allocated to the results of the best six subjects obtained in one or more Leaving Certificate examinations. If only five subjects are presented and the candidate meets the eligibility requirements they will be used to give the applicant's educational score.

(i) In the case of the Architectural Technician Course DT01, applicants are required to take an aptitude test in March/April. Applicants who demonstrate a particular suitability in this test are invited to an interview assessment. A maximum of 100 points are awarded for the applicants performance in the aptitude test and up to a further 100 points for the interview assessment. The results of the aptitude test and the interview assessment are combined with the educational points scored in the best six Leaving Certificate subjects (or five if only that number is presented) to produce an overall rating.

(ii) In the case of all other courses (i.e. DT02, DT03, DT04, DT05, DT13, DT41, DT42, DT44, DT45 and DT46) the selection is based on the educational points scored in the best six subjects in the Leaving Certificate (or five subjects if only five are presented).

</table>

A weighting factor of 1.5 was applied to Mathematics and 1.2 to appropriate Science subject points scores for these courses in 1990. Weightings will not be applied to these courses in 1991.

Due to the inclusion of aptitude tests and/or interviews in the selection process it is not feasible to give the number of points which were required to gain entry to the following courses in 1990: Architectural Technician (DT01/B101), Buildings Maintenance (DT05/B171), Printing (DT13/B130) and Transport Engineering (DT19/B150).

SPECIAL CATEGORY APPLICANTS

The following types of applicants are processed as special cases. All such applicants seeking admission to the First Year of any of the College courses listed in CAO/CAS Handbook should apply directly to CAO/CAS using the standard application form available by the specified closing date. When returning the completed form/applicants should ensure that page 3 is fully completed and include all documentary evidence available, including examination results, in support of their applications.

(a) Mature Applicants: A mature student who is 24 years of age or over at the time of enrolment and who does not meet the normal minimum admission requirements may be considered for admission to appropriate courses after attending in person for interview and satisfying the College Authorities as to his/her ability to benefit from the proposed course. Such applicants may be required to sit and pass an entrance or suitability test before admission. The Application Form should clearly indicate "Mature Applicant" in the space provided on page 3.

(b) Overseas Students: Overseas students seeking admission to the College should apply to CAO/CAS not later than 15th December, 1990 using the standard application form available on request. When completed this should be forwarded with documentary evidence of qualifications in English (translations should be certified by an appropriate authority) showing subjects passed, levels and grades obtained.

Because of the large number of applications received each year from qualified Irish applicants, and the limited number of places available, the College regrets that it may have to limit admission of overseas applicants to the small quota of places reserved for those who are sponsored by official agencies linked to Ireland's development aid programme.
(c) Trade Students: Students holding the Senior Trade Certificate of the Department of Education with one endorsement in Mathematics or a science subject satisfy the minimum eligibility requirements for courses in the DIT Colleges which specify a pass in five subjects in Leaving Certificate Examination as the entrance requirement. Students holding this Certificate with three endorsements in academic subjects are eligible for consideration for entry into related professional/degree level courses provided that they also meet any special entry requirements (e.g. Higher Level Mathematics for Engineering courses). Where endorsements subjects are not offered in the trade examinations, a pass in an appropriate subject of the Elementary Technological Certificate Examinations of the Department of Education is an acceptable equivalent.

(d) Holders of N.C.E.A. National Certificates and Diplomas or Similar Level Awards: Applications for entry into the First year of any of the College's courses should be made using the standard CAO/CAS application form.

Applicants seeking admission into the Second or subsequent years should contact the College Admissions Office for a special application form and further information about the procedures.

Such applicants should request their former College to forward in confidence to the Admissions Office a full transcript of results (including subjects studied and grades obtained) as soon as they are available but in any event not later than 10th July. The applications will not be processed until this has been received.

(e) Applicants Seeking Exemptions from one or more years of a College Course: The general procedure is as in (d). Such applicants should ask their former College to forward in confidence to the College Admissions Office, a full transcript of previous attainments which it is claimed will justify the exemptions sought. The application will not be processed until this is received.

(f) Transfer/Re-Entry Applications: Current students who wish to transfer from one course to another within the College or previous wholetime students who wish to re-enter the College into a year other than the First Year should apply on the appropriate form to the College Admissions Office (Room 315).

Queries relating to Special Category Applicants should be directed in the first instance to the College Admissions Office or to the Head of the appropriate Academic Department in the College.

OFFERS AND ACCEPTANCE IN 1991

Applicants will be assessed in accordance with the procedures already indicated and offers of places will be issued simultaneously, where appropriate, in respect of the CAO List and the CAS Lists. While it is possible that an applicant will receive three offers [in respect of each list in accordance with the preference(s) entered] acceptance must be confined to one of them. Otherwise any offers made may have to be withdrawn.

The acceptance procedure involves completing the appropriate section of the Offer Notice and returning it by the specified date after it has been duly stamped by a Bank to confirm that the required acceptance deposit has been paid. Further information about the Offer and Acceptance procedure is given on page 5 of the CAO/CAS Joint Handbook 1991.

The College will communicate in writing with the successful applicants for its courses in early September, advising them of registration procedures and the commencement date (which is expected to be during the third week of September).

Students attending for registration will be required to present the following documentation:
(a) the CAO/CAS offer notice carrying a bank stamp
(b) three copies of a recent passport type photograph signed on the back.
(c) other documentation as requested.

An applicant who is offered a place in a course which is not his/her first preference may subsequently be offered a place in a course of higher preference if such a place becomes available. This applies whether or not the earlier offer has been accepted by the applicant.
FEES, GRANTS AND SCHOLARSHIPS

FEES

Fees are payable before commencing attendance at classes and are not refundable except where a class or course does not form. An enrolment is not transferable from one student to another. Enrolment/registration is only complete when a student is issued with his/her official College Student Card. This must be retained by the student for inspection by staff at any time while he/she is in the College.

GRANTS

(a) Irish and European Community Students

<table>
<thead>
<tr>
<th>Wholetime</th>
<th>Diploma/Degree Courses</th>
</tr>
</thead>
<tbody>
<tr>
<td>B101; B121; B122; B123; B124; B125</td>
<td>£942</td>
</tr>
<tr>
<td>B110; B111</td>
<td>£754</td>
</tr>
</tbody>
</table>

(b) Overseas Students from Non-European Community Countries

| Wholetime courses | £2,100 |

*Includes College examination fees — NCEA examination fees are extra where applicable.

(d) Local Authority Grants: Students who register for the Diploma/Degree level courses conducted by the College are eligible to apply to the Local Authority where their parents or guardians normally reside for a Higher Education Grant. Information on eligibility conditions and application forms are available from the appropriate Local Authority (County Council or Corporation).

(b) VEC Scholarships: Students who register for courses leading to Certificate or Diploma awards and who do not benefit from ESF Training Grants may be eligible to apply to the Vocational Education Committee of the area where their parents or guardians normally reside for a VEC Scholarship. Information on eligibility conditions and application forms are available from the appropriate Vocational Education Committee.

(c) ESF Training Grants: ESF (European Social Fund) training grants may be available to Irish students aged over 16 years while they are pursuing certain two or three year courses provided their attendance record and general performance is satisfactory. These grants cover tuition fees and also provide for payment of a monthly allowance. The courses which are included in the scheme in the 1990/91 session are marked by a double asterisk (**) in the Table on page 11. For Session 1990/91, a grant of £15.19 per week (full attendance) was payable to students who travel or who could reasonably be expected to travel daily between their home and the College, or whose home is within 15 miles of the College. A grant of £38.14 per week (full attendance) was payable to other eligible students.

(e) The G.H. Minet Insurance Co. Scholarship: This company, in association with the Construction Industry Federation, has initiated a scholarship scheme which is open to students who have completed a construction trade apprenticeship and have gained admission to designated construction related whole time courses conducted by the College. The scholarship will be advertised locally within the College and may have a value of up to £1,000 per annum.

(f) BETA Scholarships: These are offered by the Engineering Graduates of the College to nominated students in the whole time degree level Engineering courses who achieve particularly a meritorious performance in the previous year of their course. The BETA Silver Medal is awarded to the outstanding Engineering degree graduate each session.

(g) McNerney Scholarships: To mark the seventy-fifth anniversary of its establishment and its close association with the College, the firm of Thomas McNerney & Company Ltd., Builders and Contractors, initiated a special scholarship scheme in 1984. This provides encouragement and support for students who have achieved an outstanding level of performance in the Construction Technician whole time and part time courses and wish to continue their studies in the Construction Economics Diploma/Degree courses. Two scholarships each valued at £500 are awarded each year on the nomination of the College.
(h) John Sisk & Sons Scholarship Fund: To mark the 50th anniversary of the commencement of the firm's building operations in Dublin, this fund was established to assist students who on successful completion of the Construction Technician Diploma continue their studies in the College in preparation for the examinations of the Chartered Institute of Building. A scholarship of value up to £1,000 may be awarded to a student who achieves exceptional performance in years work and examinations in the Final year of the Diploma course and enrolls in the course leading to the CIob examination.

(i) AIB Bursaries: AIB, in association with the Association of Vocational Education Colleges, has been operating a scheme of bursaries to support and encourage students who have already successfully completed a Certificate or Diploma course in a VEC College and were accepted for transfer to a Degree level course in the same sector. Eligible candidates were required to have achieved a high level of performance and not be in receipt of any other grant or scholarship. The scheme is at present under review.

(j) Bank Loans: The major banks are prepared, under normal circumstances, to consider applications from students for loans, and enquiries about these should be directed to the banks.

AWARDS AND ACCREDITATION OF COURSES

All wholetime third-level courses conducted by the College (except the Preliminary Engineering Course B120) lead to Dublin Institute of Technology (DIT) Diploma or Certificate awards as appropriate. The majority of these awards are of long standing and are widely recognised by employers, professional bodies and academic institutions in Ireland and abroad. The courses are reviewed and assessed regularly and their standards are vouched for each year by a distinguished panel of external examiners, some of whom are drawn from other countries to ensure the international recognition of the awards.

In relation to a number of the courses there is a system of parallel awards available to those graduating. In 1976 the City of Dublin Vocational Education Committee and the University of Dublin entered into a formal agreement by which degree awards of the University with Honours classifications are available to graduates of the College who successfully complete appropriate courses in Architecture, Engineering and Surveying. Details of these awards are given under the individual course entries.

Since 1972 National Certificate and Diploma awards have been made to those graduating from the Building Services, Civil, and Mechanical Engineering Technician programmes by the National Council for Educational Awards (N.C.E.A.). More recently similar arrangements were made in relation to the Geo-Surveying, Auctioneering Valuation and Estate Agency, Buildings Maintenance, Printing, and Graphic Reproduction courses.

The College attaches high priority to ensure that its graduates meet the academic requirements of the appropriate professional bodies and periodically it receives visitations from them to accredit the various course programmes.

Under a Partnership Agreement with the University of Dublin students of eight professional diploma courses conducted by the College are also eligible for appropriate degree awards with honours classification from the University without taking further examinations. Above is a group of Surveying graduates having received their B.Sc. (Surv) Degree Awards.
STUDENT ACTIVITIES, FACILITIES AND SERVICES

The Student Union is the student's representative body in the College. It promotes the social and organisational side of student life and sees after the interest of students in the College. Every student becomes a member of the union on enrolment. It is affiliated to the Union of Students in Ireland.

The Union is administered by an executive which is elected annually by the student body and is headed by two sabbatical fulltime officers - a President and a Deputy President who are responsible for the overall co-ordination of union policy in addition to the day to day running of the Union. The Deputy President has specific responsibility for welfare, sports clubs and course related issues. Each class elects its own representative who acts as spokesperson to their Department and Student Union Executive.

The Union provides a number of commercial services including a student shop selling stationery, drawing equipment, confectionery and newspapers and it also provides photocopying services. It issues the International Students Identity Card (USIT Card) and provides information on student welfare and travel.

Other services provided by the Union include assisting members in finding suitable accommodation, organising lunchtime concerts, discos and other social events and promoting College clubs and societies by supporting them financially out of student capitation funds.

Full time Officers for 1990/1991 session
President: Gary Croke
Deputy President: Rodni Maguire

Restaurant Facilities
The College has an extensive Restaurant which is open throughout the session for lunches and teas as well as morning and afternoon snacks.

First Aid Service
A First Aid service is provided in co-operation with the Order of Malta.

Physically Disabled
Physically disabled applicants are welcome to the College and most areas in it should be readily accessible to them. Students who may require special attention or have an unfavourable medical history are asked to provide details in writing to the College Secretary/Registrar in advance of enrolment.

Banking Facilities
The College has a banking facility on campus which is currently operated by the Bank of Ireland.

The College Library
The College Library has seats for 450 readers, and is open for about 60 hours per week over six days a week during term time. The Library has some 50,000 volumes and most of the collection is on open access to readers.

Extensive collections of appropriate technical journals, slides, videos and sound tapes are available for use in the Library. Library equipment includes photocopiers, microfiche readers and other information services, a microfiche printer, a microfilm printer, VCRs and monitors, tape slide viewers and a CD-ROM drive.

Hours of Opening
Term Time — Monday — Thursday 9.30 am — 9.30 pm
Friday 9.30 am — 5.30 pm
Saturday 9.30 am — 1.00 pm

The Computing facilities of the College involve both centralised and local resources. The centralised facilities are currently based on a VAX cluster of an 8600 and 8350 which are housed in the DIT Computing Centre at 14 Upper Mount Street. These are networked with the facilities of the individual DIT Colleges over leased Bord Telecom lines. The College has its own Dec System 5400 multi-user system and extensive microcomputing facilities including North Star, Wang and NCR networks as well as significant numbers of IBM, Compaq, Wyse and Prompt stand alone units. The College also has a ten unit Apple Desk Top Publishing system, an Advanced Manufacturing Laboratory and other specialised computer based equipment. It expects to take delivery of a number of high powered work stations with extensive graphics facilities in late 1990.

Counselling Service
The DIT Student Counsellor offers students professional advice relating to academic, personal and vocational matters on a confidential basis.

Chaplaincy
A multidemoninational chaplaincy service is available to promote the development of the college community in both the spiritual and temporal sense. A number of religious services are held during the session.

 Clubs and Societies
There are a large number of active clubs and societies in the College including

Clubs
Badminton, Basketball, Canoeing, GAA, Cycling, Equestrian, Golf, Mixed Hockey, Karate, Mountaineering, Orienteering, Rugby, Sailing, Soccer, Squash, Ski, Swimming/Polo, Table Tennis, Walking, Weights and Wind Surfing.

Societies
Anti-Apartheid, Architectural Students Association, Auctioneers and Valuers, Business, Cáideas, Construction Technician, Christian, Engineering Technician, Film, Geo Surveying, Green Society, Motor Industry Management, Photographic, Printing, Property Economics, Quantity Surveyors, Students Against Destruction of Dublin (SADD), Student Engineers (SSE), Third World and St. Vincent de Paul.
INFORMATION ON THE DIFFERENT WHOLETIME COURSES OFFERED BY THE COLLEGE
ARCHITECTURE, SURVEYING AND BUILDING COURSES

B101 ARCHITECTURE — DIPLOMA/DEGREE

CAO Course Code FT01

This is a five-year wholetime course which prepares students wishing to make their careers in Architecture. The course covers a wide range of subjects and aims at a synthesis of knowledge gained from the use of these subjects in architectural design projects culminating in a Final Year Thesis in the design of a major building. Students are required to gain professional experience in architectural office practice during the summer vacations and, in this way, support their study and their ability to work individually, or as members of a team.

Eligibility Requirements

The minimum educational qualification required for entry is the Leaving Certificate with passes in six subjects, at least two of which must be at Grade C or higher in the higher level course, or an equivalent qualification. The six subjects must include Mathematics and English.

Applicants will be required to undertake an aptitude test and, if successful in this, they are also interviewed as part of the selection process.

Course of Study

First Year

Second Year

Third Year

Fourth Year

Fifth Year
Studio Work; Economics and Cost Control, Urban Design, Professional Practice II, Structural Engineering IV, Conservation Studies, Building Construction V.

Awards

Graduates of this course are eligible for the following awards: Diploma in Architecture (Dublin Institute of Technology), Bachelor of Architectural Science (University of Dublin).

They are also eligible on graduation for Associate Membership of the Royal Institute of Architects of Ireland. Following two years of postgraduate experience they may take the Institute’s examination in Professional Competence and thus become Members of the RIAI. Success in the third year of the Diploma in Architecture Course gives exemption from the Intermediate Examinations of the RIAI.

The Diploma in Architecture of the College is a qualification which is recognised for the profession of architect in member States of the European Economic Community.

Career Opportunities

The qualification is for the profession of Architect. Architects are concerned with the design of buildings and supervision of building projects. They may practice in a personal professional capacity, or in employment in private and public sector organisations. The field of practice is quite extensive in Ireland and abroad and may offer alternatives of general practice or specialisation throughout a career. Some graduates spend a time abroad to gain wider and more varied design experience.

The course and the career require a creative aptitude for design on the scale of architecture and the organisational ability for its implementation in practice. The range of subject material in the course is wide, and calls for an interest and ability in artistic and cultural aspects as well as in technical matters and in managerial skills.

Dept. in Charge Architecture & Town Planning

B102 ARCHITECTURAL TECHNICIAN DIPLOMA

CAS Course Code DT01

This is a three-year wholetime course leading to an Architectural Technician Diploma award. It aims to give the student a high standard of architectural and technical drawing and presentation, with a good knowledge of building construction, materials, methods and equipment. The course uses the project system extensively during which students are required to prepare working drawings, details, schedules etc. for building work. Lectures in selected subjects such as Building Construction, Structures, Materials and Services are integrated with the projects as far as possible. During the summer vacation period students are encouraged to obtain suitable practical work experience to complement their College training.

Eligibility Requirements

Leaving Certificate with passes in five subjects including Mathematics and English or an equivalent qualification. Applicants will be required to undertake an aptitude test, and if successful in this they are also interviewed as part of the selection process.
Course of Study

First Year

Second Year

Third Year

Awards
Graduates from this course are eligible for the following award:
Architectural Technician Diploma (Dublin Institute of Technology)

This Diploma is recognised for Membership by the Institute of Architectural and Associated Technologists, and for Technician Membership by both the Incorporated Association of Architects and Surveyors, and the Royal Institute of the Architects of Ireland. It is also recognised for Associate Membership of the Society of Architectural and Associated Technicians (SAAT) in the U.K. and for full Membership subject to approved postgraduate experience.

Career Opportunities
The majority of graduate Architectural Technicians are employed in private professional architectural offices. Other areas of employment are the architectural and technical sections of Government Departments, Semi-State bodies, Local Authorities, and the building industry generally, with Contractors and Manufacturers. A number choose to work overseas for a few years to gain useful and wider experience.

Dept. in Charge
Architecture & Town Planning.

B110 PROPERTY ECONOMICS — DIPLOMA/DEGREE

CAO Course Code FT03

First Year

Second Year
Law; Construction Technology, Property Management and Marketing, Quantitative Methods, Valuations, Planning Economics.

Third Year
Maintenance of Buildings, Valuations, Urban Economics, Planning Law, Taxation, Investment Analysis. During this year students undertake a major integrated project.

Fourth Year
Valuations, Urban Economics, Planning, Taxation. In the fourth year each student prepares a major dissertation as part of the Final Examination.

Awards
Graduates of this course are eligible for the following awards:
Diploma in Property Economics (Dublin Institute of Technology) Bachelor of Science (Surveying) (University of Dublin).
Upon successful completion of a test of professional competence, holders of these awards are eligible for Corporate Membership of the Royal Institute of Chartered Surveyors (General Practice Division). They are exempted from the Intermediate Examination of the Royal Town Planning Institute and are also accepted for entry to appropriate post-graduate courses in Ireland and abroad. The course is also recognised by the Irish Auctioneers and Valuers Institute.

Career Opportunities
The qualification is for the profession of Chartered Surveyor, which includes occupations in the field of construction and property management.

Property Economists are concerned with the broader areas of land and property development, valuation surveying, estate management and town planning. They are employed in private and public organisations such as property development companies, valuation consultants, local authorities and the national valuation office.

The courses and careers in the discipline of Surveying call for an interest and ability in the financial and legal aspects of the construction industry, and in the managerial skills applied to building and property developments.

To date, Property Economists have obtained suitable employment, mostly in private practice, but also in areas such as the financial investment departments of banks and insurance companies.

Dept. in Charge: Surveying & Building Technology

Site visit.

B111 CONSTRUCTION ECONOMICS — DIPLOMA/DEGREE

CAO Course Code: FT02

This is a four year wholetime course which prepares students wishing to make their careers in Construction Economics. It is designed for those who wish to work as quantity surveyors and economics advisors in the construction industry or as building development co-ordinators and building managers. The course provides a sound general education in the different aspects of this field with emphasis on practical construction economy and, in consequence, the course incorporates such project work. Students are encouraged to gain industrial and professional experience during the summer vacations and in this way they are introduced to applying their technical knowledge to practical problems, working individually or as a team.

Eligibility Requirements
The minimum educational qualification required for entry is the Leaving Certificate with passes in six subjects, at least two of which must be at Grade C or higher in the higher level course or an equivalent qualification. The six subjects must include Mathematics and English.

Course of Study

Fourth Year: Building Economics, Construction Administration & Management, Measurement.

In the fourth year, each student prepares a major dissertation as part of the final examination.

Awards
Graduates of this course are eligible for the following awards: Diploma in Construction Economics (Dublin Institute of Technology) Bachelor of Science (Surveying) (University of Dublin)

Upon successful completion of a test of professional competence, holders of these awards are eligible for corporate membership of the Royal Institute of Chartered Surveyors (Quantity Surveyors Division), and the Construction Surveyors Institute. The Chartered Institute of Building requires graduates to undergo an additional examination in management subjects and satisfy an interview board as to their professional experience before admitting them to membership. Graduates are also accepted for entry to appropriate post-graduate courses in Ireland and abroad.
Career Opportunities
The qualification is for the profession of Chartered Surveyor, which includes occupations in the field of construction and property management.

The Construction Economist is concerned with the more detailed aspects of the construction and site development. He may specialise as a quantity surveyor, in which case he analyses building designs for purposes of cost planning, detailed tendering and cost control. Alternatively he may practice, as a building manager with responsibility for the organisation of contracts, for labour, materials, plant, and negotiations with main and sub-contractors.

The courses and careers in the discipline of surveying call for an interest and ability in the financial and legal aspects of the construction industry, and in the managerial skills applied to building and property developments. In general, Construction Economics Graduates have obtained employment in quantity surveyors offices and in the construction industry with contractors and developers.

Dept. in Charge Surveying & Building Technology.

B114 CONSTRUCTION TECHNICIAN CERTIFICATE/DIPLOMA

CAS Course Code DT02
This is a wholetime course leading to a Construction Technician Certificate award after two years and a Diploma award on completion of an additional year. It is designed to meet the needs of the construction industry for technical staff having a sound understanding of the principles of construction and construction materials, together with a good appreciation of management skills and the economics of the industry.

Eligibility Requirements
First Year: Leaving Certificate with passes in five subjects including Mathematics and English, or an equivalent qualification.

Third Year (Diploma Stage): Applicants are expected to have reached a good standard at the end of the Certificate or Second Year, or possess an equivalent qualification acceptable to the College.

Course of Study
First Year
Builders Accounts, Building Materials & Environmental Science, Mathematics, Construction Technology I, Site Surveying I, Quantity Surveying I.

Second Year

Third Year

Students are encouraged to gain industrial experience during the summer vacation.

Awards
Students who successfully complete the course are eligible for the following awards:
Construction Technician Certificate (Dublin Institute of Technology)
Construction Technician Diploma (Dublin Institute of Technology)

Holders of the Diploma are entitled to Membership Part I of the Chartered Institute of Building following two years experience in building practice. The Construction Surveyors Institute admits holders of the Diploma to Licentiate Membership.

Career Opportunities
These awards are particularly suitable for those who wish to attain positions relating to production planning, purchasing, quality control, estimating, surveying, inspection and general administration in the Construction Industry. They also provide a suitable background for those who wish to make their careers in building in the public sector (i.e. Central and Local Government).

The majority of the past graduates work in building firms as Estimators, Building Surveyors, Programmers, Planners, Contract Managers and Site Managers. Many have attained a high level in management where they are now executive directors or managing directors. Other graduates are working for consultants in various capacities.

Dept. in Charge Surveying & Building Technology.

B115 GEO-SURVEYING TECHNICIAN CERTIFICATE/DIPLOMA

CAS Course Code DT03
This wholetime course prepares students for a Technician Certificate award in Geo-Surveying after two years and a Technician Diploma award on completion of an additional year.

There is a good balance between the theoretical and practical aspects of Geo-Surveying thereby ensuring a sound understanding of the applications of its technology. Project work is a significant feature of the course and is an important element in the overall assessment.

Eligibility Requirements
First Year: Leaving Certificate with passes in five subjects including Mathematics and English or an equivalent qualification.
Third Year (Diploma Stage): Applicants are normally expected to have reached Credit or Distinction level in the Certificate Examination at the end of the Second Year in order to qualify for admission to the Third Year. However, those holding a Pass Certificate and at least one year of appropriate post-Certificate experience will be considered.

**Course of Study**

**First Year**

**Second Year (Certificate Stage)**

**Third Year (Diploma Stage)**

Field camps are conducted at the end of both the First and Second Years. In addition students are expected to gain practical experience during the summer vacation.

**Awards**
Graduates from this course are eligible for the following awards:

(a) Technician Certificate/Diploma in Geo-Surveying (Dublin Institute of Technology)

(b) National Certificate/Diploma in Geo-Surveying (National Council for Educational Awards)

Holders of the Diploma are eligible for membership of the Society of Survey Technicians, Institute of Civil Engineering Surveyors and for exemptions from the Part I/II Land Survey Examination of the Royal Institution of Chartered Surveyors.

**Career Opportunities**
The Geo-Surveying Technician may be employed in a wide variety of occupations such as with engineering, land survey and hydrographic consultancies as well as with mining, photogrammetric and construction companies.

CAS Course

B116 AUCTIONEERING VALUATION AND ESTATE AGENCY
CERTIFICATE/DIPLOMA COURSE

CAS Course

This course has been developed to prepare students for a Certificate Award in Auctioneering, Valuation and Estate Agency after two years of full-time study. Those who achieve a good standard in the Certificate may proceed to a Diploma award after a period of suitable employment. They are required to undertake a prescribed course of study and course assignments as well as a dissertation on an appropriate topic.

Eligibility

Requirements

Leaving Certificate with passes in five subjects including Mathematics and English, or an equivalent qualification.

Course of Study

First Year

Valuations, Quantitative Methods, Economics, Law, Complementary Studies, Building Construction, Financial Management.

Second Year

Third Year

Enter into suitable employment at the end of the Second Year after which they return to the College to undertake a prescribed course of study, carry out assignments and complete a dissertation on an appropriate topic as well as the end of session examinations.

Awards

Students who successfully complete the course are eligible for the following awards:

(a) Certificate in Auctioneering and Estate Agency (after two years) and Diploma in Auctioneering Valuation and Estate Agency (after a further year) (Dublin Institute of Technology)

(b) National Certificate in Business Studies, (Auctioneering, Valuations and Estate Agency) (after two years) and National Diploma in Business Studies, (Auctioneering, Valuations and Estate Agency) (after further year) (National Council for Educational Awards)

Career Opportunities

The course is suitable for those wishing to prepare for a career as an auctioneer, estate agent and property valuer and aims to give an understanding of the legal, economic and physical framework within which the property market functions. It also aims to give the basic skills needed to practice as an auctioneer.

The course meets the academic requirements of both the Irish Auctioneers and Valuers Institute (IAVI) and the Institute of Professional Auctioneers, Valuers, and Livestock Salesmen. These are professional bodies in the field of Auctioneering and Estate Agency in the Republic of Ireland. Auctioneers and Estate Agents are involved in the sales, lettings, management and valuation of property. Generally, they work either in partnerships or practice on their own account.

The career is suitable for those with an interest in people and in the built environment. Other desirable character traits are an outgoing nature together with an ability to get on with people.

Dept. in Charge Surveying & Building Technology
This two-year whole-time course has been developed to prepare students for a Technician Certificate award in Buildings Maintenance. The programme extends over the full academic session from September to June. The course has a good balance between theoretical and practical aspects and participants are given an appreciation of a range of construction skills. Students are encouraged to spend the summer vacation gaining practical work experience in the areas of Buildings Maintenance and Inspection, Building Supplies, Technical Sales and related activities.

Eligibility
Leaving Certificate with passes in five subjects including Mathematics and English or an equivalent qualification.

Course of Study
First Year

Second Year

Awards
Students who successfully complete the course are eligible for the following awards:

(a) Buildings Maintenance Technician Certificate (Dublin Institute of Technology).

Career Opportunities
The Buildings Maintenance Technician may find employment in a variety of areas such as Buildings Maintenance, Maintenance Contract Administration, Building Inspection, Building Supplies and DIY Sales, Technical Sales, Trainee Estimating, Purchasing Officer etc.

There may also be opportunities in these areas for self employment.
B121 BUILDING SERVICES ENGINEERING — DIPLOMA/DEGREE

CAO Course Code FT04

This a four year whole-time course which prepares students with suitable aptitude and educational background for a career in Building Services Engineering. It is a broadly based course in the early years, and becomes more specialised in Building Services Engineering in later stages. Project work is a major element in the programme. In the third year a Joint project with Architectural and Surveying students is undertaken and in the final year a specialised thesis or design project is required. The course requires a good mathematical and analytical ability. Students are encouraged to obtain suitable summer employment in the industry to complement their studies.

Eligibility Requirements

The minimum educational qualifications required for entry are the Leaving Certificate in six subjects with Grade C or higher on higher level papers in Mathematics and a suitable Science subject (i.e. Physics, Chemistry, Physics with Chemistry, Applied Mathematics, Construction Studies & Engineering) and a pass in four other subjects which must include English, or an equivalent qualification.

Course of Study

First Year

Second Year

Third Year

Fourth Year
Mathematics and Computing, Environmental Engineering, Building Services Design, Electrical Services, Building Services Plant, Construction Management and Laboratory Work. A major project is also undertaken.

Awards
Graduates of this course are eligible for the following awards:
Diploma in Engineering (Dublin Institute of Technology)
Bachelor of Science (Engineering) (University of Dublin)

They are eligible for membership of the Institution of Engineers of Ireland and are also accepted for entry to appropriate University post-graduate courses in Ireland and abroad.

Career Opportunities

The qualification is appropriate to those wishing to make their careers in Building Services Engineering which is concerned with design and installation of Mechanical and Electrical Services necessary to ensure the efficient operation of modern buildings. They form part of the team of professionals involved with construction projects and work closely with Architects, Quantity Surveyors and Structural Engineers.

Graduates have good prospects of employment with consulting engineers, design offices, contracting firms, research organisations, as well as state and semi-state agencies and local authorities. Some may pursue post graduate studies in Ireland or abroad directly after graduating or they may go abroad to work initially and in this way gain wider or specialised experience.

Dept. in Charge
Engineering Technology

B122 MECHANICAL ENGINEERING — DIPLOMA/DEGREE

CAO Course Code FT04

This a four year wholetime course which prepares students with a suitable aptitude and educational background for a career in Mechanical Engineering. It is a broadly based engineering course over the first two years with specialisation in the third and final years and it requires a good mathematical and analytical ability. Project Work is an important element in the programme and commences in the second year. A major project is undertaken in the final year on which both a thesis and oral presentation are required. Laboratory work is undertaken throughout the course. Students are encouraged to obtain suitable summer employment in engineering to complement their studies.

Eligibility Requirements

The minimum educational qualifications required for entry are the Leaving Certificate in six subjects with Grade C or higher on higher level papers in Mathematics and a suitable Science subject (i.e. Physics, Chemistry, Physics with Chemistry, Applied Mathematics, Construction Studies and Engineering) and a pass in four other subjects which must include English, or an equivalent qualification.

Course of Study

First Year

Second Year
Third Year

Fourth Year

Awards
Graduates of this course are eligible for the following awards:
Diploma in Engineering (Dublin Institute of Technology)
Bachelor of Science (Engineering) (University of Dublin)

They are eligible for membership of the Institution of Engineers of Ireland and are also accepted for entry to appropriate University post-graduate courses in Ireland and abroad.

Career Opportunities
The qualification is appropriate to those wishing to specialise in either General Mechanical or Process Engineering. Mechanical Engineers are likely to be involved with the design and construction of all types of equipment ranging from individual items to complete factories or process plants. They may also be involved with the management of projects and firms and with the maintenance of plant and equipment.

Graduates have a good prospect of employment in general mechanical engineering or processing firms, with state and semi-state bodies, and research organisations. The range of jobs available includes engineering design, maintenance, consulting engineering and plant management. Some also pursue post-graduate studies in Ireland or abroad directly after graduation or they may go abroad to work initially and in this way gain wider or specialised experience.

Dept. in Charge
Engineering Technology
Awards
Graduates of this course are eligible for the following awards:
Diploma in Engineering (Dublin Institute of Technology)
Bachelor of Science (Engineering) (University of Dublin)

They are eligible for membership of the Institution of Engineers of Ireland and are also accepted for entry to appropriate University post-graduate courses in Ireland and abroad.

Career Opportunities
The qualification is appropriate to those wishing to specialise in either Manufacturing or Production Engineering. Production Engineers are likely to be involved with the manufacture of all types of products ranging from individual items to large batches using robotics and highly automated machines. They may also be involved with the management of projects and industries and with the maintenance of plant and equipment.

Graduates have good prospects of employment in manufacturing firms, with state and semi-state bodies and research organisations. The range of jobs available includes design, industrial engineering, production and factory management. Some also pursue post-graduate studies in Ireland or abroad directly after graduation or they may go abroad to work initially and in this way gain wider or specialised experience.

Dept. in Charge Engineering Technology

B124 DIRECTORS ENGINEERING DIPLOMA/DEGREE

CAO Course Code FT04

This is a four year wholetime course which prepares students with a suitable aptitude and educational background for a career in structural engineering. It is a broadly based engineering course in the early years, specialising in structural design in the later stages. Project work is a major element in the programme and in the final year a thesis and oral presentation on a special topic studied are required. The course requires a good mathematical and analytical ability. Students are encouraged to obtain suitable summer employment in the industry to complement their studies.

Eligibility Requirements
The minimum educational qualifications required for entry are the Leaving Certificate in six subjects with Grade C or higher on higher level papers in Mathematics and a suitable Science subject (i.e. Physics, Chemistry, Physics with Chemistry, Applied Mathematics and Construction Studies & Engineering) and a pass in four other subjects which must include English, or an equivalent qualification.

Course of Study
First Year
Mathematics, Mechanics, Materials Science, Physics, Engineering Technology, Engineering Drawing, Communications and Social Studies, Workshop, Laboratory Work and Computing.

Second Year
Mathematics, Mechanics, Surveying, Fluid Mechanics, Materials Science, Concrete Technology and Geology, Structural Theory, Construction Studies & Environmental Technology, Economic and Social Studies and Laboratory Work.

Third Year

Fourth Year

Awards
Graduates are eligible for the following awards:
Diploma in Engineering (Dublin Institute of Technology)
Bachelor of Science (Engineering) (University of Dublin)

They are eligible for Membership of the Institution of Engineers of Ireland and are also accepted for entry to appropriate University post-graduate courses in Ireland and abroad.

Career Opportunities
The qualification is appropriate to those wishing to make their careers in Structural Engineering, which is a specialisation of
Civil Engineering. Structural Engineers are concerned with the design and construction of buildings, bridges and special structures. They form part of the team of professionals involved with construction projects and in this way work closely with Architects, Quantity Surveyors and Building Service Engineers.

Graduates have prospects of employment with structural design offices, contractors, research organisations, as well as state and semi-state agencies and local authorities. Some pursue post-graduate studies in Ireland or abroad directly after graduating or they may go abroad to work initially and in this way gain wider or specialised experience.

**Dept. in Charge**

Engineering Technology.

**CAS Course**

B126  
CIVIL ENGINEERING TECHNICIAN CERTIFICATE AND DIPLOMA

**Code DT41**

This course prepares students for a Technician Certificate award in Civil Engineering at the end of two years and for a Technician Diploma award at the end of a further year of study. The students attend the College from September until the end of May each year and they spend the Summer months gaining practical experience in approved Civil or Structural Engineering design offices, construction sites, etc. The course requires an analytical ability to understand and solve technical problems.

**Eligibility Requirements**

First Year: Leaving Certificate with passes in five subjects including Mathematics, an appropriate Science subject (see page 14) and English, or an equivalent qualification.

Third Year (Diploma Stage): Students are expected to reach Credit (Merit) or Distinction level in the Certificate Examination at the end of the second year to qualify for admission to the third year of the course leading to the Diploma award. Students who hold a Pass certificate and at least one year of appropriate post-Certificate experience may also be considered. The Diploma stage is specialised and is focused on Structural Design.

**Course of Study**

First Year

Second Year (Certificate Stage)

Structural Design and Detailing, Mathematics, Concrete, Geology and Soil Mechanics, Surveying, Construction Services and Supplies, Planning and Administration, Complementary Studies Laboratory Work.

Third Year (Diploma Stage)

Theory of Structures, Structural Design, Municipal Engineering, Structural Design (Steel/Concrete), Engineering, Mathematics, Computing, Management Studies and a Project.

**Examination and Other Requirements**

(a) Students take a College examination at the end of each session which is moderated by the National Council for Educational Awards, and the Dublin Institute of Technology.

(b) They are required to submit reports on their project and laboratory work.

**Awards**

Graduates of this course are eligible for the following awards:

(a) Technician Certificate/Diploma in Civil Engineering (Dublin Institute of Technology)

(b) National Certificate/Diploma in Engineering (Civil) (National Council for Educational Awards)

**Recognition by Professional Bodies**

Those who have successfully completed the Certificate Stage of the course meet the academic requirements for Technician status with the Institution of Engineers of Ireland, while those who have completed the Diploma stage meet the Technician Engineer level and can qualify for the non-Corporate Associateship grade of membership after they have completed a suitable period of practical training.

**Career Opportunities**

The qualification is appropriate to those wishing to enter engineering as a Technician specialising in Civil Engineering. Civil Engineering Technicians may be involved in the design and construction of buildings, bridges, roads, water supply, sanitary services, etc. They may also be involved in drafting, surveying, laboratory and field work, and the planning and supervision of contracts.

Graduates have prospects of employment in contracting firms, engineering design offices, state and semi-state bodies, and research organisations engaged in Civil Engineering work.

**Dept. in Charge**

Engineering Technology
B127 BUILDING SERVICES ENGINEERING TECHNICIAN CERTIFICATE AND DIPLOMA

CAS Course Code DT42

This course prepares students for a Technician Certificate award in Building Services Engineering at the end of two years and for a Technician Diploma award at the end of a further year of study. The students attend College from September until the end of May each year and they spend the Summer months gaining practical experience in heating, ventilation and air conditioning, in consulting engineers' offices and related industry. The course requires an analytical ability to understand and solve technical problems.

Eligibility Requirements

First Year: Leaving Certificate with passes in five subjects including Mathematics, an appropriate Science subject (see page 14) and English, or an equivalent qualification.

Third Year (Diploma Stage): Students are expected to reach Credit (Merit) or Distinction level in the Certificate Examination at the end of the second year to qualify for admission to the third year of the course leading to the Diploma award. Students who hold a Pass Certificate and at least one year of appropriate post-Certificate experience may also be considered.

Course of Study

First Year

Second Year

Third Year

Examination and Other Requirements

(a) Students take a College Examination at the end of each session, which is moderated by the National Council for Educational Awards, and the Dublin Institute of Technology.
(b) They are required to submit reports on their project and laboratory work.

Awards
Graduates of this course are eligible for the following awards:
(a) Technician Certificate/Diploma in Environmental/Building Services Engineering (Dublin Institute of Technology)
(b) National Certificate/Diploma in Engineering (Building Services) (National Council for Educational Awards).

Those who have successfully completed the Certificate stage of this course meet the academic requirements for Technician status with the Institution of Engineers of Ireland, while those who have completed the Diploma Stage are at Technician Engineer level and can qualify for the non-Corporate Associateship grade of membership after they have completed a suitable period of practical training.

Career Opportunities
This qualification is appropriate to those wishing to enter engineering as a technician specialising in Environmental/Building Services Engineering. Environmental/Building Services Engineers are involved with the design and installation of all types of building services such as heating, ventilation, air conditioning, water and electrical services. They are also involved with the drafting, planning and management of projects and the maintenance of plant and equipment.

Graduates have good prospects of employment with mechanical services contractors and in design offices. The range of jobs available includes engineering design, maintenance engineering, consulting engineering and technical sales.
MECHANICAL ENGINEERING TECHNICIAN CERTIFICATE 
AND DIPLOMA

This course prepares students for a Technician Certificate 
award in Mechanical Engineering at the end of two years and 
for a Technician Diploma award at the end of a further year. 
The students attend the College for eight months each year 
commencing in September, and they spend the Summer period 
getting practical experience in industry, design offices etc. The 
course requires an analytical ability to understand and solve 
technical problems.

Eligibility
Requirements
First Year: Leaving Certificate with passes in five subjects 
including Mathematics, an appropriate Science subject (see 
page 14) and English, or equivalent qualification.

Third Year (Diploma Stage): Students are expected to reach 
Credit (Merit) or Distinction level in the Certificate Examination 
at the end of the second year to qualify for admission to the 
third year of the course leading to the Diploma award.

Students who hold a Pass Certificate and at least one year of 
appropriate post-Certificate experience may also be considered. 
The Diploma stage is specialised. At present two options are 
offered — Manufacturing Technology or Process Plant

Course of Study
First Year
Mathematics, Engineering Science, Drawing Mechanics, 
Workshop Technology, Instrumentation and Materials, 
Computing and Complementry Studies.

Second Year
Mathematics, Thermal and Fluid Plant, Electrotechnology and 
Controls, Complementry Studies, Mechanics, Drawing and 
Design, Production Technology, Computing and Laboratory 
Work.

Third Year
Common Subjects: Mathematics, Electrotechnology and 
Controls, Management Studies and Computing.

Manufacturing Option: Manufacturing Technology I & II, 
Manufacturing Management, Manufacturing Design, Mechanics 
and Project Work.

Process Option: Materials Science, Process Plant Technology I 

Examination 
and Other 
Requirements
(a) Students take a College examination at the end of each 
session, which is moderated by the National Council for 
Educational Awards and the Dublin Institute of Technology.
(b) They are required to submit reports on their project and 
laboratory work.

Awards
Graduates of this course are eligible for the following awards:
(a) Technician Certificate/Diploma in Mechanical Engineering 
(Dublin Institute of Technology)
(b) National Certificate/Diploma in Engineering (Process or 

Those who have successfully completed the Certificate Stage 
of this course meet the academic requirements for Technician 
status with the Institution of Engineers of Ireland. Those who 
have completed the Diploma Stage are at Technician Engineer 
level and can qualify for the non-Corporate Associateship grade 
of membership after they have completed a suitable period of 
practical Training.

Career Opportunities
The qualification is appropriate to those wishing to enter 
Engineering as a Technician specialising in Mechanical 
Engineering. Mechanical Engineers and Technicians are 
concerned with the design, manufacture and installation of all 
types of equipment ranging from individual items to complete 
factories or process plants. They may also be involved in 
drafting, detailing planning and management of projects and 
with plant maintenance.

Graduates have prospects of employment in manufacturing or 
processing firms, research organisations, as well as State and 
semi-state agencies.

B150
TECHNICIAN CERTIFICATE IN TRANSPORT ENGINEERING/ DIPLOMA IN MOTOR INDUSTRY MANAGEMENT

CAS Course
This whole-time course prepares students for entry into the many and varied responsible positions in the Motor Industry. The course leads to the award of a Transport Engineering Technician Certificate at the end of two years study and to the award of the Diploma in Motor Industry Management at the end of a further year's study.

Eligibility Requirements
Leaving Certificate with passes in five subjects, including Mathematics and English, or an equivalent qualification.

Course of Study
First Year

Second Year

Third Year

Examination and Other Requirements
Progress to successive years of the course will be on the basis of the student's work during the session, and success in the College sessional examinations. Only students who successfully complete the Certificate stage and who display an aptitude for management will be accepted for the Diploma Stage. A requirement of the course is that students spend 2-3 months each Summer Vacation in suitable employment in the Motor Industry gaining appropriate experience. Where students are unable to arrange this employment, the Institute of the Motor Industry, the College Authorities and the Student Society of Motor Industry Management may assist in their placement.

Awards
Graduates of the course are eligible for the following awards:
Technician Certificate in Transport Engineering (Dublin Institute of Technology)
Diploma in Motor Industry Management (Dublin Institute of Technology).

Career Opportunities
There are many and varied career opportunities in the automobile and transport industries for those completing these courses including the following: Vehicle Body Repair Supervisor, Garage Service Department Supervisor, Reception Engineer, Vehicle Salesperson, Training Advisor, Vehicle Finance Company Representative etc. Generally they progress to more senior management position in the Retail Motor Industry or Transport Industry.

PRINTING COURSES

TECHNICIAN CERTIFICATE IN PRINTING/DIPLOMA IN PRINTING MANAGEMENT

B130
CAS Course Code DT13

This course is designed to prepare young people for technical/managerial positions in printing and related industries. The course leads to a Certificate award in Printing after two years of study and to a Diploma Award in Printing Management after a further year's study.

Eligibility Requirements
First Year: Leaving Certificate with passes in five subjects including Mathematics and English, or an equivalent qualification.

Diploma Stage (Third Year): Certificate in Printing with Credit (Merit) or Distinction or a pass with one year of relevant work experience or an acceptable equivalent qualification.

Course of Study

The following subjects are included in the Diploma (third year) programme: — Management Accountancy, Marketing, Estimating, Production Planning, Quality Management, Costing, Computer Science, Languages, Management Science.

Awards
Graduates from this course are eligible for the following awards:
(a) Technician Certificate in Printing (Dublin Institute of Technology), National Certificate in Technology (Printing Technology) (National Council for Educational Awards)
(b) Diploma in Printing Management (Dublin Institute of Technology), National Diploma in Business Studies (Printing Management) (National Council for Educational Awards)

Career Opportunities
The majority of graduates to date have found positions in printing, packaging, publishing or advertising firms in the following areas: Estimating, Production Planning, Cost Accountancy, Marketing, Quality Management, Customer Services and Technical Liaison.

DIPLOMA IN GRAPHIC REPRODUCTION TECHNOLOGY

B131

This one year course in Graphic Reproduction Technology has been formulated in response to the needs of the graphic industries for creative personnel with experience of the production and finishing processes in the graphic arts.

Students following this Graphic Reproduction Technology course design and process a wide range of items for print production. They are trained in photocomposition, camera and studio work, paste-up and planning, offset printing, screen printing and print finishing, and are expected to use these skills to produce finished products from their own designs. The objectives were formulated in consultation with interested bodies in the graphic communications industries, following a realistic assessment of the requirements for print designers.

Entrance Requirements
National Certificate in Design of the NCEA with Credit (Merit) or Distinction; or National Certificate in Design of the NCEA with a pass and one year's relevant working experience; or National Diploma in Design of the NCEA; or equivalent qualifications.

Intending students should apply directly to the College and are required to present a portfolio of recent work.

Course of Study

Award
Graduates of the course are eligible for the following awards:
(a) Diploma in Graphic Reproduction Technology (Dublin Institute of Technology)
(b) National Diploma in Technology (Graphic Design) (National Council for Educational Awards)

Career Opportunities
Graduates find suitable employment with advertising agencies, design studios, printing firms and publishing companies. They will also be capable of setting up and running their own studios.
